PROJECT EXPERIENCE

Ecommerce Site:
- The html file displays products dynamically, while script.js fetches data from an API and inserts it into the webpage. Each product has an image, title, category, rating, and a "View More" button. Clicking a product stores its ID in local Storage. A search function filters products by title or category, enhancing user experience

Food Munch: Your Go-To Destination for Delicious Meals & Easy Ordering
- Developed a responsive food delivery website with Bootstrap, featuring an interactive menu, restaurant search, and secure payment options. Implemented a dynamic UI with a carousel, dropdowns, and user authentication for seamless user experience."

EduFord: University Website for Online Learning & Courses
- Developed a responsive university website using HTML, CSS, and JavaScript, featuring course details, a blog section, and an interactive navigation system. Ensured a user-friendly interface with a modern design for enhanced accessibility and engagement.

Weather Website:
- Get the current weather data from Fess API fey from OpenWeatherMap and display the weather information like Temperature, Weather condition, Humidity and Wind Speed according to the city on our website or app. We will display the weather info on website from Free API using JavaScript. In this weather app we will add one search box where user can enter the city name and get the weather information of the particular city.

EXTRACURRICULAR

IoT and Embedded Systems Club: As Public Relations(PR) person, led the publicity and marketing of the club. UBA**(Unnat Bharat Abhiyan):** As Coordinator, -Conducted comprehensive surveys to identify common problems and growth opportunities in rural villages focusing on education, healthcare, and infrastructure.
-Gathered and analyzed data on village demographics, resources, and socio-economic challenges to inform sustainable development initiatives.
